

Project description:

Overview:

To develop, maintain, operate and transfer truck terminal at WADI Cement Plant.

The project partner has to develop the existing truck yard near WADI-1 Main gate covering area of 31960 sqm. (340 mtrs *94 mtrs) (picture & proposed diagram given below) as per ACC approved design having the facility of

- Concrete truck yard for 300 trucks/Bulkers & 80 long vehicle
- Minimum 25 Offices with twin partition for Transporters
- SAP Terminal Room for DO & LA printing
- 1 Medical Centre
- 1 Safety room with equipments & officer
- 1 STD/Fax/Xerox, Stationary etc.
- 1 Saloon
- Rest room on first floor to accommodate 50 people
- 10 Bath rooms & toilets
- Food Complex
- RFID System with RFID spot & LED display at both the end
- Workshop with minimum facilities to manage most frequent breakdown
- Garden/Green atmosphere

Operation & maintenance will be carried out by the Project Partner/third party as may be finalized and will include traffic management activity through RFID system i.e.:-

- Parking of inward truck/trailer/bulkers at allotted locations
- Movement of empty vehicles for loading as per ACC requirement
- Movement of empty vehicles for unloading as per ACC requirement

The Project partner will have right to collect parking charges from the truck drivers/owners as decided in due course of time.

After a reasonable period of time (as decided) Project partner will hand over the truck yard to the Company and relinquish the right to collect the parking.

Project cost & duration:

Cost:

To be estimated by project partner based on above requirements (Land, Boundary wall & RFID system will be in the scope of ACC). It will have to be entirely borne by the Project Partner.

Duration:

Construction of Truck Yard will have to be completed within 6 month from the start date.
Duration of right of revenue collection will be decided in due course mutually.
